

CEI

By using proven construction management and inspection performance procedures, DMK Associates, Inc. has guided a diverse range of successful projects, both public and private, to completion and acceptance.

DMK's review of design and construction methods focuses on improving and shortening the construction schedule, which in turn, saves Clients time and money. DMK's Construction Management and Inspection Team's expertise, along with strong city and agency relationships, allows the flexibility and responsiveness to meet specific project requirements.

Often, a project's requirement for success is dependent on positive community relations. DMK works directly with the public agencies and communities to meet their mutual needs with construction phasing planned to minimize disruptions to the project area.

Services include:

- Construction Management
- Neighborhood Enhancements
- Roadway Design
- Drainage Design
- Public Works Programs
- Infrastructure Coordination & Strategies
