

Coastal & Marine

Beginning in the 1980's, DMK developed the Engineering and Permitting expertise working with the Florida Department of Environmental Regulation on construction seaward of the Coastal Construction Control Line. This experience has proven to be invaluable in assisting coastal land owners through the maze of permitting requirements relevant to structures seaward of the coastal construction control line, meeting county and state code requirements.

Services include:

- Building Permits Seaward of the CCCL
- Beach Reclamation
- Canal Dredging
- Waterway Maintenance
- Dock and Marina Construction
- Beach Pavillions and Dune Walk Over's
- Feasibility Studies
- Home Additions

Engineering Possibilities
