

# Surveying & Mapping

DMK's Surveying and Mapping Division is recognized as one of the areas most reputable. DMK maintains one of the largest libraries of surveying records in southwest Florida, having been in business for 25 years and having performed thousands of survey projects in both the public and private sectors.

DMK has been selected as land surveying consultants to municipal clients such as Charlotte County, Charlotte County School Board, City of Punta Gorda, Englewood Water District, Sarasota County School Board, City of North Port and Sarasota County as well as countless private clients. They recognized the advantages of retaining DMK as their surveyors on projects covering the broad range of scope one would expect from a complete surveying firm.
